COURSE:

Description: This is the second course of the calculus-based introductory physics sequence. The course covers concepts of electric charges and forces, electric field and potential, electric circuits, magnetic field and electromagnetic induction, and electromagnetic field and waves. This course is required for most science and engineering majors.

Objectives: To develop students’ problem solving skills in a systematic manner, while providing a balance of quantitative reasoning and conceptual understanding.

Outcomes: Upon the completion of this course, students should be able to 1) evaluate electrostatic forces in a system of multiple point charges or continuous charge distributions; 2) evaluate electric field due to a system of multiple point charges or continuous charge distributions; 3) calculate electric flux and apply Gauss’ law; 4) calculate conductivity, charge and current densities in conductors; 5) apply Kirchhoff’s and Ohm’s laws in circuit analysis; 6) evaluate capacitance for various geometries; 6) apply Ampere’s and Biot-Savart laws to evaluate magnetic forces and magnetic field due to a system of moving charges and current paths; 7) calculate magnetic flux and apply Faraday’s and Lenz’s laws to current loops; 8) conduct steady-state and transient circuit analysis involving combinations of inductors, capacitors and resistors; and 9) solve problems involving motion of charged particles in electric and magnetic fields.

Structure: Students have the responsibility to study the concepts prior to each class. Class time is used to explain content and deal with misconceptions, subtleties, connections and applications.

All course material is available on Canvas. Please study the course syllabus and schedule also posted on Canvas carefully. Please proceed by reviewing the lecture notes, viewing any lecture videos and attempting the practice problems posted on Canvas per the schedule of topics/chapters listed in the course schedule.

Please note the schedule of Midterm Exams and the Final exam listed in the course schedule. Midterm Exams and the Final Exam will be administered on campus.

You should self-enroll on The Expert TA using course key which you will find towards the end of this document. There are also more practice assignments for you to attempt on WebAssign. You should self-enroll on WebAssign using the class key, which you will also find towards the end of this document.

Self-Assessment: There will be practice problems posted weekly on the Expert TA. The practice problems are meant to act as means of self-assessment, and their scores will count as bonus points towards the final grade.
Learning:  

Study Groups  

Attending Supplementary Instructional Sessions (SIS) is highly recommended. For further information on SIS visit http://www.ucae.uncc.edu/ University Center for Academic Excellence (Fretwell) Phone: 704 687 2162.

SI Schedule for the semester: To be announced

Physics Department Resource Center is open every MTWR at Burson 135A.

For individual free tutoring, visit http://www.ucae.uncc.edu/ University Center for Academic Excellence (Fretwell), Phone: 704 687 2162.

Math Skills  

An operational knowledge of basic college algebra, trigonometry and calculus (differentiation and integration) skills are essential for your success in science and engineering courses. The following are good websites for self-assessing your understanding of these topics as prerequisite for your introductory physics courses.

http://www.krysstal.com/trigonometry.html  
http://www.krysstal.com/algebra.html  
http://www.wtamu.edu/academic/anns/mps/math/mathlab/col_algebra/  

It is highly encouraged that you visit these online math tutorial sites to fortify your grasp of basic math skills. Please make use of the self-assessment tools and tutorials within the referenced sites.

Helpful sites to supplement your learning for Math and Physics are:

http://www.khanacademy.org/  
http://mathfortress.com

COURSE FORMAT  

- Online Lectures  
  Full lecture videos are posted on the following link:
  
  http://clas-pages.uncc.edu/phys2102/  
  
  The online lectures cover the corresponding sections of the text. It is important to study and understand the step by step solution of online examples in order to be able to successfully attempt the Practice Problems on Expert TA.

- Midterm Exams  
  
  There will be 3 Midterm exams. Please note the dates, times and locations for Midterm exams in the Course Schedule posted on Canvas.

- Final Exam  
  
  Final Exam is on Thursday, May 4, 2017, from 8:00 AM – 10:30 AM. Location TBD. ALL STUDENTS TAKE THE FINAL EXAM ON CAMPUS.
  
  Every student is obligated to take the Final Exam on the scheduled date and time as indicated above. NO EXCEPTIONS! Missing the final exam will result in a grade of F.
  
  The Final Exam is scheduled by the university, and its time and place can not be changed.

IMPORTANT NOTE: ONLY BASIC SCIENTIFIC CALCULATORS ARE ALLOWED IN THE FINAL EXAM. CALCULATORS WITH GRAPHING AND/OR MEMORY CAPABILITIES ARE NOT ALLOWED. CELL PHONES ARE NOT ALLOWED DURING THE FINAL EXAM. DO NOT BRING YOUR CELL PHONE TO THE EXAM ROOM.
GRADING:

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Midterm 1</td>
<td>25%</td>
</tr>
<tr>
<td>Midterm 2</td>
<td>25%</td>
</tr>
<tr>
<td>Midterm 2</td>
<td>25%</td>
</tr>
<tr>
<td>Final Exam (Comprehensive, All sections)</td>
<td>25%</td>
</tr>
<tr>
<td>TOTAL</td>
<td>100%</td>
</tr>
<tr>
<td>Expert TA Practice Assignments (Bonus Points)</td>
<td>5%</td>
</tr>
</tbody>
</table>

Grades are assigned using a 10-point grading scale: A = 90.0-100.0, B = 80.0-89.9, etc.

Online Course Management Tools:

All students need to self-register to The Expert TA. Please click on the link below and follow the instructions.

The Expert TA:

Student Registration - PHYS 2102-A01
Registration Link:
https://www.theexpertta.com/registration/

Student Class Code:
UST35NC-61A6F1-1DA

Note: Registering in multiple sections, multiple times in a section or using a false name is considered violation of academic integrity. If you mistakenly register to a wrong section then it is your responsibility to get in touch with The Expert TA helpdesk to move your name to the correct section.

WebAssign:

To access the e-text and additional tutorial and practice assignments students need to self-register on the WebAssign (http://webassign.net) using the class key: uncc 4143 9369

Academic Integrity

Academic honesty and integrity are essential to the existence and growth of an academic community. Without maintenance of high standards of honesty, members of the instructional faculty are defrauded, students are unfairly treated, and society itself is poorly served. Maintaining the academic standards of honesty and integrity is ultimately the formal responsibility of the instructional faculty; and this responsibility is shared by all members of the academic community. UNC Charlotte strives to create an academic climate in which the dignity of all individuals is respected and maintained. Therefore, we celebrate diversity that includes, but is not limited to ability/disability, age, culture, ethnicity, gender, language, race, religion, sexual orientation, and socio-economic status.

Students have the responsibility to know and observe the requirements of The UNCC Code of Student Academic Integrity (Catalog p. 275). This code forbids cheating, fabrication or falsification of information, multiple submissions of academic work, plagiarism, abuse of academic materials, and complicity in academic dishonesty. Any special requirements or permission regarding academic integrity in this course will be stated by the instructor, and are binding on the students. Academic evaluations in this course include a judgment that the student’s work is free from academic dishonesty of any type; and grades in this course therefore should be and will be adversely affected for academic dishonesty. Students
who violate the code can be expelled from UNCC. The normal penalty for first offense is zero credit on the work involving dishonesty and further substantial reduction of the course grade. In almost all cases the course grade is reduced to F. Students are expected to report cases of academic dishonesty to the course instructor.
